**WRECK “ETNEA (TIHANY)” IN THE UNIJE ISLAND**

**Description**: wreck diving position, diving from the boat - “Tihany” was a steamship of the Croatian-Hungarian society, the Maritime Company that maintained the line Istria - the islands of Lošinj and Cres. It sank in 1914 during a great storm. The wreck is 60 meters long and 7 meters wide. It is located at a depth of 27 to 39 meters and is laid along a wall that goes vertically from the bottom to a depth of 10 meters. Distance: 16 Nm / Depth: 28 m – 40 m

Categories: Open Water Diver, Advanced Diver and more

**GALIOLA, CLIFF**

**Description**: diving wall, diving from the boat - Galiola cliff is located in the Kvarner bay, between Istria and the island of Unije. It stretches in an east-west direction and is about 150 meters long. It is easily recognizable by its lighthouse. The location is on the open sea, so access is possible by boat exclusively. Diving boat is anchored on the south side of the islet about 250 meters from the shore in the extension of the pier, where the depth is about 12 meters. There are two walls that are great for diving, with multiple canyons through which it is possible to dive. The dive ends with an ascent through the canyon leading to a safety stop. This location is one of the most beautiful diving walls in Kvarner bay, full of sea life.

Sea depth: 43 m / Depth: 8 m - 40 m / Categories: Open Water Diver, Advanced Diver and more

**IT IS REQUIRED TO BRING DIVING CERTIFICATE!**

**DIVING INSURANCE IS NOT MANDATORY, BUT IT IS PREFERABLE.**

ISLAND VELIKI BRIJUN

Description: The excursion starts by boarding the Martinabella boat in Pula (on the waterfront). The boat will take passengers to the central Brijuni port where they will be greeted by tourist guides that will give them a tour of the island. This part of the excursion involves a one-hour ride on the tourist train along the coast and all the way to the north of the island where the Safari Park is located. The tour includes a visit to the site richest in strata, a site that has been inhabited for the longest time on Brijuni, the Byzantine castrum, as well as the nearby St. Mary’s Basilica, the oldest Christian building on the island. Next is the visit to the Bronze Age hillfort and to luxurious 1st-century Roman residential villa in Verige Bay. The tour ends with a visit to the 15th-century church of St. German, which houses a part of the original mosaic from the Verige Bay Roman villa. After visiting the island of Veliki Brijun, the excursion continues with a boat tour of the Brijuni archipelago. The tour includes lunch on the boat.

ROVINJ & BATANA ECO-MUSEUM

Description: Through varied research programs based on knowledge, respect for cultural heritage and dialogue, inclusion, innovation, interdisciplinary approach and the use of multimedia, Batana Eco-museum evaluates, protects, interprets, recreates, presents and communicates tangible and intangible maritime heritage and actively reinforces the cultural identity and uniqueness of Rovinj as a pleasant place to live for all of its residents and remarkable destination for all of its visitors.

The spacio or, in the Rovinj dialect, spàcio, is actually a localised version of a tavern or wine cellar and is another peculiarity of Rovinj which helps shape the town’s identity and its people. It is the place where the people of Rovinj, in their stone houses, keep, taste and sell wine, but it is also a place for socialising, eating, playing briškula and trešeta, singing and entertainment.
